

In order to further strengthen protections for our customers Shell Lake State Bank will be implementing additional online banking security measures beginning August 10th, 2021. With the first login after August 10th, you will be prompted to validate your identity with a one-time passcode delivered via phone (either voice or text message). You may be prompted in future logins to validate your identity but as the system recognizes your activity and history you should not need to validate your identity again unless a significant change is detected.

As a part of this process, we ask that you please look at the contact information listed in your Profile for online banking verify that the contact information is current.

Thank you for trusting Shell Lake State Bank to ensure your online safety.
